

Coronavirus safety measures - A guide for visitors to Marriotts School.

Where possible please keep visits to outside of normal school hours.

We are delighted to have been able to welcome back all of our students on a full timetable. This return is essential for their education and wellbeing. As a school we have implemented a system of controls to ensure the school remains the safe space it has always been. The school is following several measures to reduce the risk of spreading Coronavirus through the school community:

1. Prevention

Minimise contact with those that are unwell.

Any adult or student that experiences symptoms of coronavirus will be asked to leave site ASAP and will be isolated whilst awaiting being picked up. They will be asked to get tested and feed-back the results ASAP so that the school can liaise with Public Health England.

Please do not attend our site if you have experienced symptoms or should be isolating due to recent contact with an infected person/if you should be quarantining.

2. Face coverings

All visitors are asked to wear appropriate face coverings when attending Marriotts School. If you are exempt, please wear an exemption lanyard or inform us on arrival to the school.

Many Hertfordshire secondary schools have decided to further strengthen their Covid measures by mandating the wearing of masks at certain times. This is in order to provide an extra layer of protection for students, staff and visitors.

Marriotts School have decided that the wearing of masks will be compulsory for all students, staff and visitors at lesson transitions, in communal areas and at all other times, except during lessons, when outside or when eating.

3. Hygiene

A very effective control measure is the increased washing of hands. We have ample washing facilities and have multiple hand sanitiser stations around the school. We are encouraging regular use of both particularly after touching shared facilities such as doors or hand rails or where you have touched your face.

You must wash your hands or sanitise on arrival to the school site and on leaving. Please ensure you support regular hand hygiene.

4. Respiratory hygiene

Another effective control measure is to effectively catch germs spread through coughs and sneezes. We have supplied additional tissues throughout the

school and request that these are used and disposed of safely.

After a cough or sneeze please follow (hand hygiene and measures) please follow Catch it, Bin it, Kill it.

5. Social distancing

We are a large school and it is challenging to guarantee social distancing at all times. We have ensured teachers have additional space in all classrooms to create distance 2 metres from students and we have issued guidance to staff on keeping and respecting social distance from colleagues and students wherever possible.

Please remember to respect others right to a safe space and keep a safe distance (ideally two meters minimum).

6. Cleaning

We have implemented a cleaning regime that includes thorough daily cleaning after school ready for the next day, continuous cleaning throughout the day of shared facilities such as door plates and handrails and cleaning of communal areas after they have been used and cleaning of shared learning spaces.

We have also a robust cleaning response to instances of staff and pupils becoming ill whilst on-site.

We have written an extensive risk assessment
which is available on our website
www.marriotts.herts.sch.uk
